Empower

Decentralised Charitable Organisation (DCO)

Thomas Nyquist, Patrick Zhang, Michael Yang, Lisen Kuo, Karthick KR, Phoowan Bosveld, Wassim Alsindi

empower@d-soc.net http://empower.d-soc.net

The current model of giving:

Charitable cause

Common problems with ICOs & charity donations:

ICOs

- Short term cash grabs
- Regulatory arbitrage

Charity donations

- Lacking incentivisation
- Mistrust in NGOs

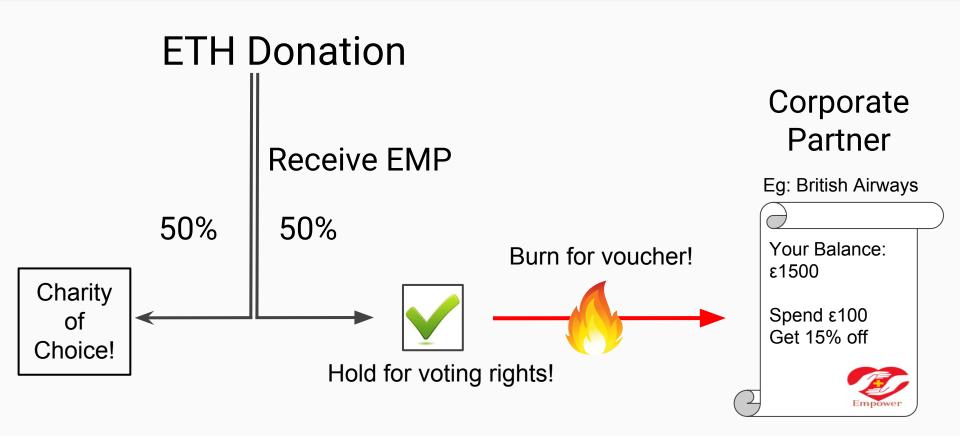

Buy One, Give One.

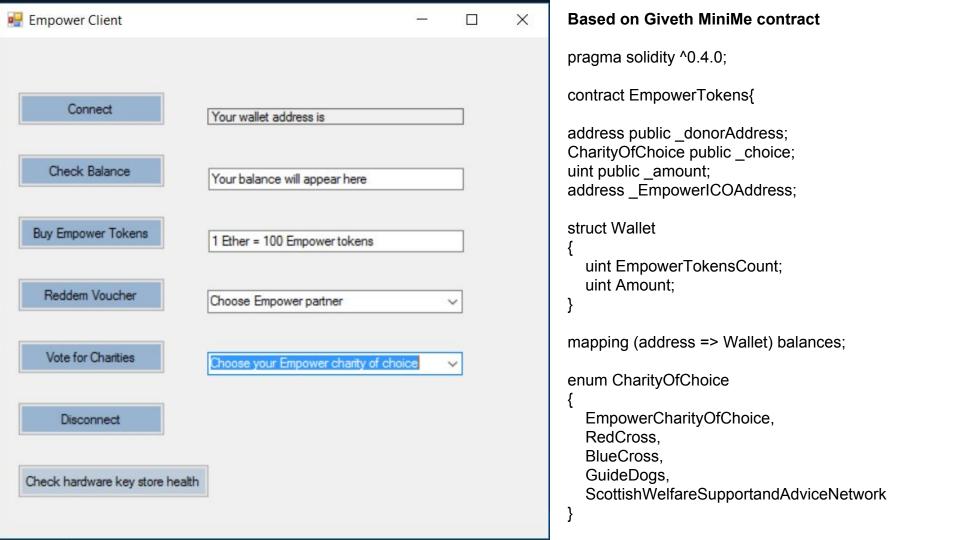

EMP token issued via long-lasting crowdsale.

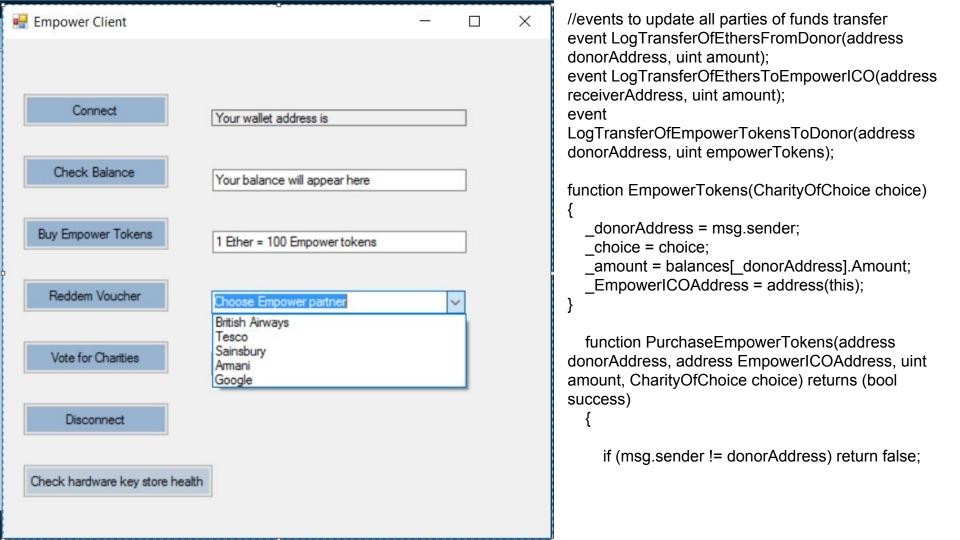

EMP holders benefit from voting rights and can burn tokens for rewards.

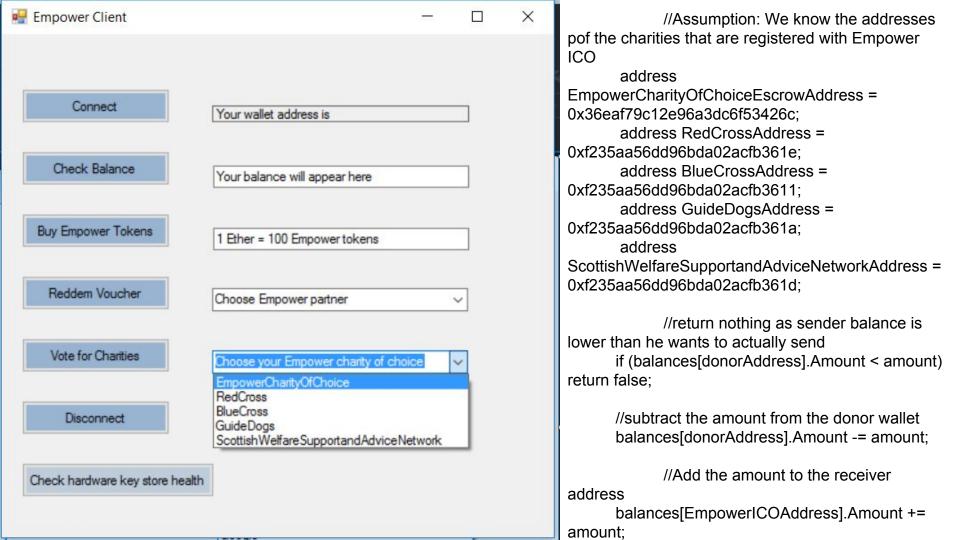

The model

A new tokenised charitable crowdfunding model combining ownership incentivisation and corporate philanthropy.

Crypto-friendly Potential Partners

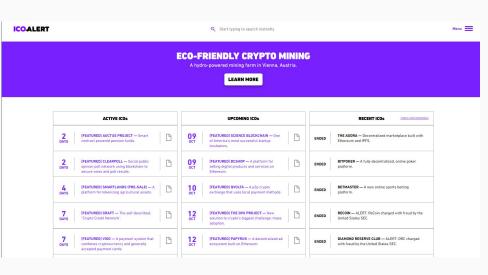

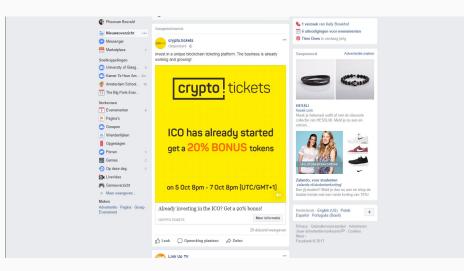

Marketing

Positioning

The future way of donating

By creating an incentivised system for donations

Vision

Creating a blockchain based platform that is transparent, effective and user-friendly

Donator

- Ensure their donation is more effective
- Reaches intended destination
- Reward their goodwill

Merchant

- Positive image and Corporate Social Responsibility
- Marketing potential

NGO

- Reducing inefficiency
- Public trust
- Improve outcomes

Future Horizons

How to give the EMP platform a sustainable legacy

Phase 1

Project announcement, smart contract POC

Phase 3

White-label platform solution for non-profits

Phase 5

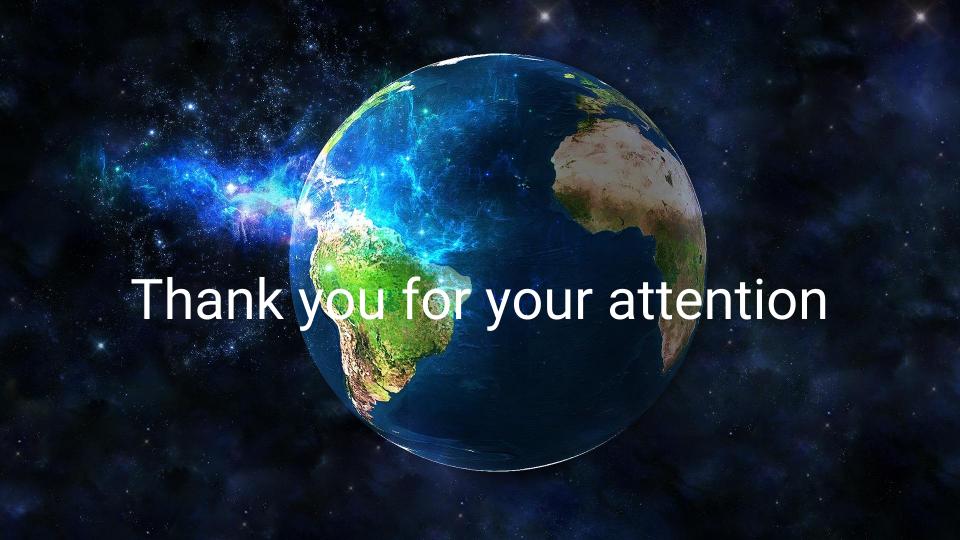

Finalisation of DCO tool suite

Phase 2

Project launch on mainnet; merch partnerships

Phase 4

CharityDEX

The Charity Ecosystem

Operational inefficiency, lack of transparency, local corruption, outcomes unclear.

Donor

Altruistic, unconditional.
Direct impact of benefit
unclear. Donations can
take a long time to reach
those in need.

Collection

Donations are collected by charity and enter an archaic and inefficient system. High operational costs in legacy systems.

Distribution

Partner organisations in beneficiary countries are at risk of corruption and chronic bureaucracy.

Beneficiary

Complex supply chains and FX / logistical costs erode value of donations.

Impact

Incentivise the cryptospace to Give (more)

Future of donations
-Choice

-Choice

-efficiency

Eventually, create a more just society

Sustainability

Risks:

Transaction risk
Security (custodian risk)

Cryptocurrency (market risk)
Regulatory influences

Benefits Incentives

The choice:

- Hold and vote
- Redeem (voucher) Transparency

Altruism

Efficiency

POTENTIAL LOCATIONS

News

One in five of the UK's biggest charities are 'spending less than half of their income on good causes' (and some spend as little as ONE PER CENT on charitable work)

- · Big UK charities 'are spending less than half their income on good work'
- Nearly 300 allegedly spent just 10% on charitable activities in three years
- And Lloyd's Register Foundation used only 1% of money on such causes
- · Other accused charities include the British Heart Foundation and Age UK
