CryptoKitties craze slows down transactions on Ethereum

🕐 5 December 2017

WWW.CRYPTOKITTIES.CO

A new craze for virtual kittens is slowing down trade in one of the largest crypto-currencies.

CryptoKitties lets players buy and breed "crypto-pets" on Ethereum's underlying blockchain network.

The game's developers told the Bloomberg news agency that CryptoKitties was a "key step" to making blockchains more accessible.

But its popularity has underscored one of the technology's biggest downsides: its lack of scalability.

Etherscan has reported **a sixfold increase** in pending transactions on Ethereum since the game's release, by the Axiom Zen innovation studio, on 28 November.

"CryptoKitties has become so popular that it's taking up a significant amount of available space for transactions on the Ethereum platform," said Garrick Hileman, from the University of Cambridge.

Ethereum touts itself as an unstoppable "world computer" that will upend industries and revolutionize finance. But, for the moment, one of its most popular applications is a game called CryptoKitties that lets players buy, sell, and breed cartoon kittens. CryptoKitties launched on Nov. 28 and has proved so popular that it's currently responsible for nearly 4% of all transactions on the ethereum network, behind just one other application, a token trading platform, according to data provider ETH Gas Station.

Ethereum address	Proportion of total transactions
0x8d12a197cb00d4747a1fe03395095ce2a5cc6819	11.14%

WORLD OF ETHER

World of Ether is a decentralized collectible dueling game that lives inside of a browser on the Ethereum Virtual Machine. The game is centered around the collection, breeding, and fighting of monsters. Each monster is stored inside of a contract and referenced by our platform.

Monsters are broken into 4 grades of rarity: common, uncommon, rare, and legendary. These monsters fall into 5 types:

Sun: Representing light, warmth, flying, and fire.

**Ocean**: Representing water, depth, and mystery.

Life: Representing fertility and vegetation.

COLLECT

Etherians are the latest collectible in what is truly the world's first decentralized game.

Store, sell and breed your valuable Etherians on the Ethereum blockchain where they are held safe and securely. Use ETH to buy eggs and discover hundreds of new monsters.
